~1.2 MB

whole app

100% offline

after first load

No account

ever

Tiny battery

no GPS / background

Private by design

- ✓ Everything stays in this browser, on this device — no account, no sign-up, no server.
- ✓ Nothing is ever sent to anyone; your details never leave your phone.
- ✓ No ads, no tracking, no analytics.
- ✓ Export a backup any time; clearing the site's data wipes everything.

Light & battery-friendly

- ✓ One small web page (~1.2 MB in all) — installs like a real app.
- ✓ Works fully offline once loaded (cached by a service worker).
- ✓ No GPS, no sensors, nothing running in the background — negligible battery and data.
- ✓ Runs on iPhone, Android and desktop; light & dark themes.

Everything it does

- ✓ Vegetarian calorie & energy tracking
- ✓ IISc Veg Mess menus — A, D & E
- ✓ One-tap mess logging per meal
- ✓ Skips fried & sugary items
- ✓ Meal-time reminders (B/L/S/D)
- ✓ Body-weight or with-weight sets
- ✓ Muscle recovery map (fresh vs sore)
- ✓ Glucose & insulin, modelled
- ✓ Weight & body-composition trends
- ✓ Live macros: Protein, Carbs, Fat, Fibre
- ✓ Day-by-day menu, weekly-alternating dishes
- ✓ Balanced plate for every meal
- ✓ Protein target from your weight
- ✓ Exercise log with front/back body map
- ✓ Calories burned from a physics model
- ✓ “Still going in” absorption over time
- ✓ Micronutrients & supplements
- ✓ Add to home screen on any device
